Kumon makes your smart kid even smarter! The unique Kumon Method can give your child an academic advantage. The math and reading programs are personalized to fit the skill level of each child. Students of all levels learn to grasp concepts on their own, and take full ownership of their success. That's how Kumon builds an academic advantage.

Kumon is the world's largest after-school math and reading program. The Kumon Method has helped millions of children achieve more than they ever thought they could. At Kumon, your child will build skills that lead to success inside and outside the classroom.

The math and reading programs help children of all ages and levels become eager, independent, self-learners. Children discover how to learn on their own and develop strong academic skills. Students gain a sense of confidence that will help them in the classroom and beyond.

Instead of passively receiving instruction from teachers or tutors, Kumon students actively develop self-learning skills. Each student progresses at his/her own pace through an individualized lesson plan carefully crafted by the instructor. Daily assignments take about 30 minutes per subject in two sessions a week at the center and at home. The Kumon Program encourages regular conferences between you and your child's instructor to help gauge progress, goals and motivation.

Step by logical step, students steadily build a solid grasp of math and reading.
