SALISBURY  
SCHOOL

Since 1946, Salisbury Summer School has been working with boys and girls entering grades 7-12 who are striving toward important educational milestones in their academic careers. Salisbury Summer School offers small classes and individualized attention to help students reach those goals. Whether students are preparing to enter high school, transitioning to independent/boarding school, entering into the college process, wishing to learn English in an authentic, traditional American boarding school setting, or simply wanting to improve their overall approach to learning, Salisbury Summer School is an ideal program to prepare students for their next step. Our faculty members use a structured curriculum to help students become effective learners while also making that experience enjoyable and rewarding. Our traditional academic program focuses on Reading and English; we offer several additional programs including: Math, English as a Second Language (ESL) for young scholars from other countries wishing to study in the United States, and an optional course in SAT/SSAT preparation to complement content and instruction that we include within our current curricula. Elective courses include: Environmental Science, Public Speaking and Creative Writing. Private one on one tutoring is also available at an additional cost. Each afternoon we offer a wide variety of athletic programs including tennis, soccer, ultimate Frisbee, golf, swimming, yoga, art and music in addition to many other offerings.
