Full Day - Campers Entering Grades 1-6

Campers spend three mornings a week at Sport Hill Farm experiencing firsthand what it is like to work on an organic farm. In addition, the program includes art, cooking and environmental science classes taught here on our campus. While planting, irrigating, and harvesting both produce and eggs, campers learn the importance of organic farming for the planet and the health benefits to themselves. Each afternoon we prepare our own locally sourced lunch followed by a nature-focused art class and a science class centered on the theme of sustainability and the environment. Classes are all taught by experts in their field. One day a week the campers go on a field experience with a different location planned for each week. From a trip to learn about the history of farming, visiting a beekeeper or learning about how food is harvested from Long Island Sound, campers learn about the food web and their impact on the world.

Sweet Peas - Campers Entering PreK-4 and Kindergarten

Our youngest campers have the option of either a full or half-day program. Taught by early childhood staff, campers experience everything our older campers do, excluding field trips. They work in our curricular garden's raised beds, experience nature through science and art, and enjoy cooking classes with our school's chef.

Our school motto, The Future is in Our Care, extends to the Farm Camp experience. The goal of our program is to cultivate respect and a natural passion to protect things in nature through authentic exposure.

Weekly Sessions from June 19th – July 14th
