## Dive into a fun, hands-on marine science camp at Project Oceanology!

Students entering grades 5-12, enjoy fun-filled learning aboard research vessels, small boats, in marine labs, and on nearby shorelines. Choose residential Ocean Camp (grades 6-12) or Ocean Explorer Academy day camp (grades 5-8).

**Ocean Camp** — The waterfront dorm at Project O will be home away from home while you participate in 6 days and 5 nights of residential marine science fun! Explore coastal, near-shore and offshore habitats as you collect and analyze scientific data about the world around you.

**Ocean Explorer Academy** — A weeklong day camp of hands-on, minds-on marine science. Cruise in Project O's fleet of small boats and investigate marine life along the shorelines. Discover the differences and similarities of marine habitats as you explore and investigate sandy beaches, rocky intertidal zones, marshes, and offshore waters.
