Kumon is an after-school math and reading enrichment program that unlocks the potential of children, so they can achieve more on their own. As a comprehensive program, Kumon serves children in preschool through high school. The learning method uses an individualized approach that helps children develop a solid command of math and reading skills. Kumon goes beyond tutoring, by actively developing critical thinking skills. Through daily practice and mastery of materials, students increase confidence, improve concentration, and develop better study skills. Kumon's time-tested self-learning program uses engaging worksheets and guidance from an on-site instructor to present new concepts and materials, giving children an academic advantage in the classroom—and throughout life.

The Kumon Reading Program is designed to build the critical reading skills that help children develop a lifelong love of reading—and a solid foundation for academic success. From fairy tales to Shakespeare, the Kumon Reading Program will take your child from learning letter sounds to reading high school-level literary texts. The goal of the program is to help all children cultivate a high level of reading ability, regardless of age or school grade.
