Curious Creatures is one of the oldest and largest mobile exhibitors in the Northeast with locations in Massachusetts and Connecticut. They will come to the location of your choice and provide an hour-long, hands-on program that is both entertaining and fun. A staff member will bring a variety of animals (approximately 10 to 12 species) and will share fun facts about each of them, teaching children respect and tolerance for all creatures that walk, crawl and slither on the earth.

Programs can be tailored to suit your needs, with rainforest creatures, desert animals, large insects and arachnids. The children will interact with all types of reptiles and amphibians, as well as cute fuzzies such as chinchillas, ferrets and guinea pigs. The Curious Creatures animals were all born and raised in captivity and are used to being around people. This contributes to a unique, fun and safe hands-on experience for children of all ages, as well as adults.
