

# Hands On Science

*Serving Connecticut and New York since 1998*

**203-938-3960**

**[www.handsonscienceenrichment.com](http://www.handsonscienceenrichment.com)**

Let **Hands On Science Enrichment** bring an outrageously cool science party to your outrageously cool little scientist. Feature activities include rocket launch (shoots 800 feet into the air), dry ice demos, hair raising static generator, whacky liquid nitrogen display, crazy smoke rings, flaming jug, super electromagnet, balloon launch (think vertical message in a bottle — they have been returned from as far away as Maine!) and more.

Take home options: color changing carnations, shark tooth fossil dig, silly putty, solar beads.

You pick the activities, you choose the take home items, we create the party. Over 100,00 children have participated in our in school, after school, camp and party programs.

We know science. We know kids.
